

EVAN POUTEAU

20 YEARS OLD

Passionate about coding. I thrive on the pure logic of web development: taking an idea, designing a database architecture, and programming clean, interactive interfaces.

Seeking a web development internship
from April 12 to June 18, 2027.

SKILLS

NEXT.JS / SUPABASE

Personal Project: "Egyptian Arabic Learning App"

- Built a full-stack Next.js web app deployed on Vercel, with a Supabase database.
- Structured 14 course modules (levels A1 to B2) in JSON, rendered dynamically.

PHP / SQL

Individual Project: "Le Lobby de l'Urbex"

- Designed the database (MCD, SQL queries) and a CRUD system in PHP (PDO).
- Secured the application with prepared statements to prevent SQL injections.

JS / CANVAS

Web App: "Portfolio Gestuel"

- Gesture-controlled augmented reality web interface (MediaPipe Hands API).
- Smooth graphic rendering and custom parallax effect with HTML5 Canvas.

UX/UI ANALYSIS & DESIGN

Team Project: "Application Filia"

- Studied target user needs by conducting qualitative interviews.
- Created persona profiles to identify psychological and technical pain points.
